Commodity-Line Classifications	6-139

(This is a listing of all commodity lines for which data are presented in this report. Codes have been assigned to the commodity lines in the listing and also in the tables. They differ only in that in the listing the number "50" has been added as a prefix in each case. The 50 was dropped from the tables as a space saving device.

(The codes serve a two-fold purpose: to enable the user of the statistics to locate lines in the tables; and to relate commodity lines to the Standard Industrial Classification system. Classifications are arranged numerically in the tables by code under kinds of business. Absence of a code indicates that the line did not loom large in the trade. Also the first four digits of the code as they appear in the listing are the appropriate SIC codes.)

EXPLANATION OF COMMODITY-LINE TABLES

Coverage, and limitation of data.--Respondents were requested to select from a printed list of commodity lines the particular ones that applied to their business and report sales analyses on the basis of records, where available, otherwise on the basis of the best possible approximations. Space was provided for writing in any commodity lines that were not listed on the Census form.

Not all respondents reported their sales by commodity line. The extent to which the analysis was reported for any particular trade may be gauged by comparing "the total of sales reported by commodity lines" with the amount shown for "sales not reported by commodity lines."

Wholesale Census questionnaires were designed so as to group related kinds of business, e.g., Form CB-50A for motor vehicles, automotive accessories, related trades. Form CB-50E for farm products and related trades, and CB-50K for scrap, waste materials, and related trades. Commodity lines that appeared on a particular census form were limited to those generally handled by the trade or kind of business. Write-in space, with appropriate instructions, was provided on each of the forms for reporting additional lines of merchandise. There appears to have been a tendency to overstate sales of products major to a trade or business, with corresponding underreporting of minor items. Likewise, some tendency to "basket" minor items in miscellaneous classifications was noted. No exact measure of this type of bias is available, but it is believed to be of a minor order.

Due to tabulating techniques used, small differences may appear between the sum of geographic division data for a particular commodity line and the total shown for the classification at the United States level.

Presentation rules.--In view of the varying degrees of commodity coverage, the small number of establishments in some trades or geographic divisions, and, the danger of disclosure of individual information, the following general rules were adopted in preparing data for publication:

Coverage.--In most of the accompanying tables, data are limited to kinds of business or geographic divisions where coverage (sales reported by commodity lines) was 70 percent or more.

Minimum number of establishments.--Data for a particular commodity line are withheld where fewer than 3 establishments in the classification reported the particular item. In this case, the data are included in the classification "Commodities n.e.c."

Most of the accompanying tables consist of a stub and five data columns: The stub includes the commodity-line code and identification of the kind of business and commodity-line description. A complete list of the commodity lines shown appears on page of this report. To assist in locating items, commodity-line codes are shown throughout the tables, arranged consecutively within a kind of business or area. Absence of a commodity (or product) code from a particular series indicates either that the item is not generally handled in the trade or, if handled, only a small amount was reported.

Tables 6A, 6B, 6C, and 6D.--These tables present information for merchant wholesalers and for assemblers of farm products, on the distribution of sales by commodity lines handled.

First data column.--Entries in this column represent the amount of reported sales of a commodity line in a kind of business. The completeness of commodity line coverage for any kind of business may be measured by the relationship between "sales reported by commodity lines" and "sales not reported by commodity lines." Generally, this comparison indicates incomplete coverage, and the amount shown for a particular commodity line may therefore be less than it would have been if all establishments had reported the commodity analysis.

Second column.--Entries in this column are determined by relating reported sales of commodity lines to total analyzed sales for the kind of business. The percentages indicate the importance of the commodity line to the kind of business. In tables 6A, 6B, 6C, and 6D percentages are shown for major commodity lines only, not for the detailed commodity lines under the numbered items. In relating sales as reported for detailed commodity lines (lines for which no percentages are shown) to total analyzed sales for the trade, consideration should be given to any amounts that may appear opposite the stub caption "Not reported in detail." Such amounts, if any, represent sales reported only at the major (or numbered) commodity-line level, not the detailed commodity line.

Because of the rounding procedure used, percentages within a kind of business or area may not add exactly to 100.0 percent.

Third column.--Entries in this column represent the number of wholesale establishments identified with the kind of business and commodity line indicated in the stub. The first entry for a kind of business represents the total number of establishments in the classification reporting commodity-line sales. Additional entries represent the number of establishments that reported sales of the specified commodity line.

Fourth column.--Entries in this column represent total sales of all commodities, including any retail sales and service receipts, etc., of the establishments which reported sales of the specified commodity line.

Fifth column.--The entry in this column represents the relative importance of a specified commodity line to total sales of establishments which reported that they handled the line. The percentages are derived by dividing entries in column 1 by entries in column 4, line by line. Entries in this column differ from those in column 2 in that they represent the importance of the particular commodity to those establishments that reported sales of the commodity. In contrast, the entry in column 2 represents the importance of the commodity to the trade as a whole, a total which frequently includes some establishments that do not handle the commodity.

Tables 6E and 6F.--These tables are similar to tables 6A, 6B, 6C, and 6D, except that quantities are also shown for specified commodity lines.

**COMMODITY LINE CLASSIFICATIONS--MERCHANT WHOLESALERS AND FARM PRODUCTS
ASSEMBLERS (TABLES 6A, 6B, 6C, 6D, 6E, AND 6F)**

Below is the list of commodity lines which appeared on the census forms used in enumerating merchant wholesalers and assemblers of farm products in connection with the 1958 Census of Business. Commodity codes, as they appear here, are the same as in the tables except that below the numeral "50" has been added as a prefix in each case. The prefix, together with the next two numbers after the "50" identifies the commodity with the Standard Industrial Classification (SIC) code of which it is a part. For example, "automotive glass" is identified in the tables by code 13100, but in the following as 5013100. The first four digits, 5013, identifies "automotive glass" as a part of the "automotive equipment" trade.

Absence of a commodity line under Kind of Business or Geographic Division indicates that it is not usually sold by establishments in the classification and that the amount, if any, was too small to record separately. Sales of commodity lines not shown separately are combined in the classification "Commodities, n.e.c." Space permitted more complete description of some classifications here than in the tables.

APPENDIX A

PROVISIONS OF LAW RELATING TO THE 1958 CENSUS OF BUSINESS

(From Title 13 United States Code)

SECTION 131. The Secretary shall take, compile, and publish censuses of manufactures, of mineral industries, and of other businesses, including the distributive trades, service establishments, and transportation (exclusive of means of transportation for which statistics are required by law to be filed with, and are compiled and published by, a designated regulatory body), in the year 1954 and every fifth year thereafter, and each such census shall relate to the year immediately preceding the taking thereof: Provided, That the censuses of manufacturers, of mineral industries, and of other businesses, including the distributive trades and service establishments, directed to be taken in the year 1954 relating to the year 1953, shall be taken instead in the year 1955 relating to year 1954. The censuses provided for in this section shall include the United States and its Territories and such Possessions as the Secretary may determine.

SECTION 224. Whoever, being the owner, official, agent, person in charge, or assistant to the person in charge, of any company, business, institution, establishment, religious body, or organization of any nature whatsoever, neglects or refuses, when requested by the Secretary or other authorized officer or employee of the Department of Commerce or bureau or agency thereof, whether such request be made by registered mail, by telegraph, by visiting representative, or by one or more of these methods,

to answer completely and correctly to the best of his knowledge all questions relating to his company, business, institution, establishment, religious body, or other organization, or to records or statistics in his official custody, contained on any census or other schedule prepared and submitted to him under the authority of this title, shall be fined not more than \$500 or imprisoned not more than sixty days, or both; and if he willfully gives a false answer to any such question, he shall be fined not more than \$10,000 or imprisoned not more than one year, or both.

SECTION 9. (a) Neither the Secretary, nor any other officer or employee of the Department of Commerce or bureau or agency thereof, may

(1) use the information furnished under the provisions of this title for any purpose other than the statistical purposes for which it is supplied; or

(2) make any publication whereby the data furnished by any particular establishment or individual under this title can be identified; or

(3) permit anyone other than the sworn officers and employees of the Department or bureau or agency thereof to examine the individual reports.

APPENDIX B

PROCEDURES AND DEFINITIONS

KINDS OF BUSINESS COVERED

This volume covers all establishments with one or more paid employees included in wholesale trade in accordance with the principles of the 1957 edition of the Standard Industrial Classification (SIC) Manual issued by the Bureau of the Budget, Executive Office of the President. Also included are wholesale liquor establishments operated by State and local governments.

METHOD OF ENUMERATION

Information for wholesale trade was obtained by means of a mail canvass. Report forms were mailed to all business firms included in the active records of the Internal Revenue Service as subject to payment of Federal Insurance Contributions Act (FICA) taxes (i.e., employers of one or more persons) and which were classified in the records of the Bureau of Old-Age and Survivors Insurance (BOASI) as wholly or partially engaged in retail, wholesale, manufacturing, and mineral industries. Also included were those classified in major groups 70 (except 702 and 704), 72, 73, 75, 76, 78, and 79 of the service industries portion of the SIC Manual, and in public warehousing, SIC major group 42, except 421. In addition, report forms were mailed to all establishments which BOASI had not classified by kind of business prior to mailing of census report forms. Each establishment was mailed a report form appropriate to its BOASI classification (for those cases for which BOASI classification had not yet been established, a general purpose form was used) but its census classification was determined by replies to questions on the census report form.

EXPLANATION OF TERMS

Active proprietors of unincorporated businesses.—Includes owners or partners of unincorporated businesses who devoted the major portion of their time to the operation of the business.

Administrative offices, and auxiliary units of wholesale establishments.—These are locations of a multiunit organization which service or are auxiliary to the wholesale establishments within the organization. They are not primarily engaged in selling merchandise. In table 8G they are subclassified into central administrative offices (including district, general, home, executive, etc., offices); research, development and testing; and other.

Auxiliaries.—See Administrative offices and auxiliaries.

Bad-debt losses.—Respondents were instructed to report the amount of receivables written off during 1958 as uncollectable.

Bin space of grain elevators.—The rated capacity of bin space for storing loose grain, feed, ear corn, etc., by country grain elevators and terminal elevators of grain merchandise firms is measured in table 8B.

Brokerage or commission received.—Merchandise agents and brokers were instructed to report amount of brokerage or commissions received on transactions negotiated for others during 1958. These amounts usually appear in the table under the heading "Operating expenses (including payroll)," footnoted accordingly.

Class of customer.—See Sales by class of customer.

Commission bulk stations.—See Petroleum terms.

Commodity-line sales.—See Sales terms.

Cooperative associations.—See Legal form of organization terms.

Cooperative bulk stations.—See Petroleum terms.

Corporations.—See Legal form of organization terms.

Country grain elevators.—These are distinguished from terminal grain elevators in that they buy grain direct from farmers primarily in trucks or wagons. Included here are establishments handling grain through properties commonly referred to as "elevators" and which are primarily engaged in buying and selling grain or in buying and assembling grain for shipment to central markets. Many country grain elevators sell feed, seed, fertilizer, and other supplies to farmers in addition to buying and shipping grain. Establishments primarily engaged in selling supplies to farmers, however, are classified as retail establishments.

Country grain elevators are classified as independent, line or cooperative elevators.

Independent country elevators.—These are country elevators operated by firms other than cooperatives, with only one such establishment in 1958.

Line elevators.—These are distinguished from independent country elevators in that two or more are operated by the same ownership.

Cooperative elevators.—These are country grain elevators owned, and operated cooperatively by farmers.

Employment-payroll terms:

Employment size.—Analysis of wholesale trade by employment size provide data for a maximum of 10 employment-size groups of establishments, based upon the number of paid employees during the workweek ended nearest November 15, 1958. Active proprietors and partners of unincorporated businesses were not regarded as employees in determining the employment size of establishments.

The 10 employment-size groups follow:

- 1 paid employee
- 2 paid employees
- 3 paid employees
- 4 or 5 paid employees
- 6 or 7 paid employees
- 8 or 9 paid employees
- 20 to 19 paid employees
- 10 to 49 paid employees
- 50 to 99 paid employees
- 100 or more paid employees

Establishments with 1 or more paid employees sometime during the year, but none during the workweek ended nearest November 15, are included in the "1 paid employee" size class.

Paid employees, workweek ended nearest November 15.—Paid employees consist of the number of employees,

PROCEDURES AND DEFINITIONS-Continued

including salaried officers and executives of corporations, who were on the payroll for the workweek ended nearest November 15.

Payroll, entire year.—Payroll includes salaries, wages, commissions, bonuses, and vacation allowances paid during the year to all employees. For corporations, it includes amounts paid to officers and executives; it does not include compensation of proprietors or of partners of unincorporated businesses. Payroll is reported before deductions for Social Security, income tax, insurance dues, etc.

Payroll, workweek ended nearest November 15.—This item consists of payroll, as defined above, which was paid to persons on the payroll in the pay period ended nearest November 15, 1958. Establishments whose payroll period was other than a week were requested to adjust the figures to a weekly basis.

Establishments.—Census of Business figures represent a summary of reports for individual "establishments" rather than "companies." A separate report was obtained for each location where business was conducted, including each location of multiunit organizations. Each report was tabulated in accordance with the physical location at or from which the business was conducted.

Where two or more activities were carried on at a single location under a single ownership, all activities generally were grouped together as a single establishment, and the entire establishment was classified on the basis of its major activity, with all data for it included in that classification. However, in cases where distinct and separate economic activities, for which different industry classification codes were appropriate, were conducted under the same ownership at a single location, and where conditions prescribed by the SIC Manual for recognizing the existence of more than one establishment were met, separate establishment reports for each of different activities were reported in the censuses.

In general, each location was counted as a separate establishment; however, in the case of public warehousing, where a company operated, as a unit, two or more buildings in a single city or metropolitan area and these buildings were all used for the same type of warehousing, the total operation was counted as one establishment.

The "number of establishments" shown in this report is the number in business at the end of the census year.

Export sales.—See Sales terms.

Form of ownership.—See Legal form of organization.

Gallon sales.—See Petroleum terms.

Independent (single unit) bulk stations.—See Petroleum terms.

Individual proprietorships.—See Legal form of organization terms.

Inventories, end of year, at cost.—Inventories consist of stocks of goods for sale at the end of the year, at cost value rather than at sale price. Goods owned by the reporting establishment are included, even though some may have been held by others on consignment, but not goods on hand owned by others.

Legal form of organization:

Individual proprietorship.—These are establishments owned by one person.

Partnership.—These are establishments owned by two or more persons each of whom has a financial interest in the business.

Corporation.—These are establishments other than cooperatives, owned by an organization or company legally incorporated under State laws.

Cooperative.—A cooperative establishment is defined as one owned by an association of customers of the establishment whether or not they are incorporated. In general, the distinguishing features of a cooperative are patronage dividends based on the volume of expenditures by the member, and a limitation of one vote per member regardless of the amount of stock owned. The establishments are open to the business public as a rule, but generally are patronized primarily by members of the association operating the business.

Other legal forms.—These are establishments whose legal form of organization is not one of those defined above. Included in this legal form are estates, receiverships, joint ventures, etc.

Line elevators.—See Country grain elevators.

Liquefied petroleum (LP) gas stations.—See Petroleum terms.

Operating expenses (including payroll).—Operating expenses include payroll as well as other overhead expenses of the establishments and prorata share of any general office expenses, but not cost of merchandise for sale nor income or excise taxes. Any withdrawals by owners or part owners of unincorporated businesses are not included.

For merchandise agents and brokers, entries under the heading "operating expenses" represent the amount of brokerage or commissions received during 1958 on purchase or sale of goods for the account of others, rather than total expenses incurred.

Paid employees.—See Employment-payroll terms.

Partnerships.—See Legal form of organization terms.

Payroll, entire year.—See Employment-payroll terms.

Payroll, workweek ended nearest November 15.—See Employment-payroll terms.

Petroleum terms:

Petroleum bulk stations.—These are establishments primarily engaged in marketing gasoline, kerosene, distillate and residual fuel oils and having bulk storage capacity of up to 2,100,000 gallons. They receive their supplies primarily by truck or rail, rather than by tanker, barge, or pipeline, and are primarily engaged in marketing products to retailers, to industrial accounts, and to farmers. Bulk stations located at refineries are included when they are operated as separate establishments.

Bulk stations are classified on the basis of ownership and method of operations as independent, commissions, salary, or cooperative. Data are shown separately for each type of bulk station in table 7B.

The terms "bulk station" and "bulk plant" are used synonymously in this volume.

Independent (single unit) bulk stations.—These are bulk stations owned and operated independently of other wholesale establishments. This classification includes bulk stations operated under the same ownership with re-

PROCEDURES AND DEFINITIONS—Continued

tail service stations but not under the same ownership with other bulk stations or terminals. This classification does not include bulk stations owned and operated as cooperatives.

Commission bulk stations.—These are owned by multiunit concerns (firms operating more than one bulk station) but are operated by a commission agent who has a proprietary interest in the business. Operators of these stations generally are paid commissions and have responsibility for the payment of various overhead costs, delivery expenses, and payroll.

Salary bulk stations.—These are bulk stations owned and operated by multiunit organizations on other than a commission basis.

Cooperative bulk stations.—These are bulk stations (single unit or multiunit) owned and operated by cooperative associations. Many of these establishments are primarily engaged in marketing products to farmers.

Petroleum bulk terminals.—Includes two classes of facilities engaged in marketing gasoline, kerosene, and distillate and residual fuel oils: (1) All facilities having total bulk storage capacity of 2,100,000 gallons or more, and (2) facilities of smaller capacity which receive their supplies primarily by tanker, barge, or pipeline.

Liquefied petroleum (LP) gas stations.—Stations and terminals with bulk storage capacity and primarily engaged in selling liquefied petroleum (LP) gas to dealers, wholesale distributors, or to industrial and commercial accounts (including Government and military).

"Refiner-marketer" or "other" ownership.—Petroleum bulk stations and terminals are also classified on the basis of ownership either as "refiner-marketer bulk stations, terminals" or as "other bulk stations, terminals." "Refiner-marketer bulk stations, terminals" are owned and operated by petroleum refining companies primarily for marketing their products, and in this respect are similar to manufacturers' sales branches. "Other bulk stations, terminals" are marketing facilities not owned by, or affiliated with, organizations maintaining refineries.

Storage capacity.—Storage capacity represents the bulk storage capacity at establishments primarily engaged in marketing refinery products and LP gas at wholesale. Establishments operated as bulk stations or bulk terminals and located at refineries are included where they are operated as separate establishments. Facilities operated as integral parts of refineries are not included. Space in pipelines, tankers, tank cars, tank farms, public warehouses, and space leased to Governmental agencies, including the military, is not included. Storage capacity is measured as of December 31, 1958.

Sales to retailers, users and consumers (petroleum bulk plants, terminals).—Gallon sales by petroleum bulk plants and terminals to retailers, users, and consumers (to gasoline service stations, service shops, governmental bodies—including the military—industrial and commercial accounts, exports and sales to truck distributors without bulk storage facilities, etc.). Sales to jobbers and distributors who have bulk plants or terminals are omitted.

Petroleum bulk stations.—See Petroleum terms.

Petroleum bulk terminals.—See Petroleum terms.

Proprietors of unincorporated businesses.—See Active proprietors of unincorporated businesses.

Receivables.—Accounts and notes derived from the sale of merchandise and services, and outstanding on the books of reporting companies—before deducting reserves for bad-debt losses—as of the end of the year. Receivables sold to banks, factors, etc., are excluded.

"Refiner-marketer" or "Other" ownership.—See Petroleum terms.

Salary bulk stations.—See Petroleum terms.

Sales terms:

Sales.—Sales include the total of merchandise sold, and receipts from repairs and from other services to customers, whether or not payment was received in 1958. Sales are normally recorded net of deductions for refunds and allowances for merchandise returned by customers. Total sales exclude amounts other than those received from customers, such as income from investments, rental of real estate, etc. They include the amount of local and State sales taxes and Federal excise taxes which are collected by the wholesale establishment directly from customers and paid directly by the establishment to a local, State, or Federal taxing agency. Gasoline, liquor, tobacco, and other excise taxes which are paid by the manufacturer and passed along to the wholesaler also are included.

The sales figures, therefore, represent total sales and receipts of all establishments primarily engaged in wholesale trade. They do not include wholesale sales made by manufacturers, retailers, service establishments, and other businesses whose primary activity is other than wholesale trade. They do, however, include receipts other than from the sale of merchandise at wholesale (e.g., retail sales, service receipts, etc.) by establishments primarily engaged in wholesale trade. Although the count of establishments as tabulated in this report represents the number in business at the end of the year, the sales figures include sales of all establishments in business at any time during the year.

Sales as shown in this report for merchandise agents and brokers represent the value of the goods involved in the sales transaction negotiated rather than commissions received, or earnings.

Sales by class of customer:

Sales to industrial, commercial, etc. users.—While the wording of the inquiry varied to some extent by reporting form, respondents were instructed to report under this classification the approximate percentage of their total sales, 1958, to industrial, commercial, professional, institutional, and governmental users, public utilities, railroads, contractors, builders, and similar types of business concerns that normally buy for business use rather than for resale of the goods in the form purchased.

Sales to contractors and builders are measured separately for Merchant Wholesalers in the lumber, building materials trades, and in the electrical goods trades. Also in the electrical goods trades, sales to public utilities and those to governmental bodies are measured separately. These variations from the general pattern are identified in footnotes to the tables, chapter 4.

Sales to consumers and farmers.—Instructions provided for reporting under this classification sales to household consumers, to farmers, and to individual users; including sales to the respondent's own employees.

Sales to retailers.—Instructions provided for reporting here sales to retailers of all types (retail chain or-

PROCEDURES AND DEFINITIONS-Continued

ganizations, independent stores, department stores, co-operative stores, vending machine operators, etc.). Sales by food and related products wholesalers to restaurants, however, are included under "sale to industrial, commercial, etc., users," not here.

Forms used in enumerating Merchant Wholesalers in the automotive and electrical goods trades provided for reporting separately sales to repair shops. Such sales are included in the classification "Sales to retailers" but identified separately in footnotes.

Sales to wholesale organizations.—Respondents were instructed to report under this classification sales to organizations that normally purchase for resale at wholesale.

Export sales.—Instructions provided for including here sales made direct to buyers in foreign countries, or through their agents in this country. United States firms operating foreign branches were instructed to include any transfers from the United States to such branches. United States territories and possessions were not considered, for purposes of this inquiry, as foreign countries.

Sales of specified commodity line.—Provision was made in the 1958 Census of Business for Merchant Wholesalers and Assemblers of farm products to report their sales by commodity-line classifications. A complete list of the commodity lines for which data are shown separately appears at the end of chapter 6.

Sales size.—The 1958 Census of Business, Wholesale Trade analyses by sales size are designed to provide data for a maximum of 10 sales-size groups for establishments operated the entire year. For the purpose of these tabulations, an establishment is classified as an entire-year establishment if it operated 10 or more months during the year and was in operation at the end of the year. Seasonal establishments, which normally operate for only a part of the year, are treated as "entire year" or "not entire year" on the basis of the length of time the establishments were owned rather than the length of time they were open for business during the census year.

For purposes of sales-size tabulations, the entire-year establishments have been classified into 10 sales-size groups depending on the value of sales and receipts reported for the year 1958. These sales-size groups are as follows:

\$10,000,000 or more
\$5,000,000 to \$9,999,000
\$2,000,000 to \$4,999,000
\$1,000,000 to \$1,999,000
\$500,000 to \$999,000
\$300,000 to \$499,000
\$200,000 to \$299,000
\$100,000 to \$199,000
\$50,000 to \$99,000
Less than \$50,000

As the class interval descriptions indicate, establishments were classified by sales-size group after the reported sales and receipts figures had been rounded to the nearest thousand dollars. The method of rounding to the nearest thousand dollars differs from methods previously used in the Census of Business. In 1958, each report was rounded by striking off the hundreds, tens, and unit digits from the reported dollars. One, representing one thousand dollars, was then added to half of the reports. This method is less costly and less susceptible to error than methods previously used, and does not cause significant differences from older methods.

Sales to retailers, users and consumers (petroleum bulk plants, terminals).—See Petroleum terms.

Standard metropolitan statistical areas.—See Appendix D.

Storage capacity.—See Petroleum terms.

Vending machines.—Coin-operated automatic machines vending such merchandise as cigars, cigarettes, candy, soft drinks, etc., operated by food, tobacco, and related products wholesalers.

Warehousing revenue.—Included here are all receipts from customers during 1958 after deducting allowances and discounts. "Revenue" includes receipts from storage, trucking, and other services performed by the warehouse; merchandise sales, including sales and excise taxes; and commissions from customers. Revenue figures therefore represent total returns from storage and related services, including any retail or wholesale sales.

Warehousing Size terms:

Employment size.—Establishments are classified by size according to the number of paid employees as of November 15, 1958. Owners of unincorporated businesses, even though they may have been actively engaged in the business, were not counted as paid employees in determining employment size, nor was their compensation included in payroll. Establishments with no paid employees during the workweek ended November 15, 1958, are included in table 10C in the smallest employee-size bracket.

Revenue size.—Establishments are classified by revenue size, 1958, in the accompanying table 10D. For purposes of this tabulation, revenue figures were rounded to thousands of dollars before establishing the size classification.

Space size.—Household warehousing and storage establishments are classified by square feet of floor space in table 10G; general warehousing and storage establishments, by square feet of floor space in table 10K; refrigerated warehousing establishments, by cubic feet of space in table 10N; and in table 10P; food locker establishments are classified by size based upon number of individual lockers installed. The classification is based, in each case, upon space assigned to public storage as of the end of the year.

Warehousing Space terms:

Occupiable public storage space.—This is warehouse net piling space which was assigned, as of the end of 1958, to storage of goods for the public. Space leased to others on a landlord-to-tenant basis, nonstorage space and that consumed by exterior or interior walls, permanent aisles, elevator shafts, stairways, offices, receiving and shipping platforms, or other areas in which goods are not usually piled are not included.

Floor space.—This is square feet of under-roof public warehouse floor space available for the storage of commodities which do not require refrigeration—commodities such as household furnishings, furniture, general merchandise, packaged goods, cotton, tobacco, lumber, and the like.

Refrigerated space.—This is the cubic feet of refrigerated (net piling) space 50°F. or below assigned to public storage of commodities, such as dairy products, fruits and vegetables, meats, and other perishable items. "Net piling space" is inside space measured from wall to wall and from floor to ceiling, less space for ventilation (outside the piling), coils, aisles, posts, sprinklers, etc.

Bulk liquid storage space.—This is tank space in gallons (shell or water capacity) for storing bulk liquid products.

PROCEDURES AND DEFINITIONS—Continued

Number of individual frozen food lockers installed.—This represents the number of lockers installed—individual lockers having storage capacity of less than 25 cubic feet. These data include only those frozen food lockers in establishments classified in the public warehouse group. See further explanation in "Kind-of-Business Classifications" for "Food lockers, with or without food preparation facilities (SIC 4223)."

Frozen food locker bulk freezer space.—This is the cubic feet of freezer space in locker facilities available for bulk storage. These data include only the bulk freezer space in locker facilities operated in establishments classified in the public warehouse group. See further explanation in the "Kind-of-Business Classifications" for "Food lockers, with or without food preparation facilities (SIC 4223)."

EXPLANATION OF TABLES

As an aid to users of the statistics, some special explanation of tables are provided below:

Receivables and bad-debt losses, Tables 3A, 3B, and 3C.—Data on receivables and bad-debt losses are presented for merchant wholesalers by kind of business at the national level in table 3A, for Standard Metropolitan Statistical Areas having 500,000 inhabitants or more in table 3B, and in table 3C for all other Standard Metropolitan Statistical Areas. The tables differ in the kind-of-business detail, with the maximum information shown at the national level.

Each of the tables is in four general parts: The first two data columns present information for all establishments including those which failed to indicate their cash-credit practices as well as those reporting on this inquiry; the second part under the heading "Establishments reporting end-of-year receivables," presents information for those reporting receivables outstanding as of the end of 1958; the third part presents information for those reporting that they did a cash business only in 1958, hence, they had no receivables at the end of the year; while the last two columns show the number of establishments and sales of those who did not report on their cash-credit practices. Data are withheld from the tables for kinds of business where coverage was less than 70 percent; that is, where sales of those not reporting their cash-credit practices represented more than 30 percent of total sales of all establishments in the kind of business.

Coverage and limitations of data, Tables 4A and 4B.—Recognizing the fact that not all wholesale firms maintain records of their sales by customer classes, respondents were instructed to report in terms of percentage of their 1958 sales, rather than exact dollar sales. Instructions further provided that where book figures were not available, respondents were to provide their best possible approximations. As may be determined by a comparison of the data in the two sales columns of the tables, not all respondents reported on this basis. The first sales column covers all establishments, including those not analyzing their sales; whereas the second is limited to sales of those reporting the analysis. Coverage for any classification is measured by the relationship between the two sales figures. Data are generally withheld for classifications in which coverage is less than 70 percent.

Class-of-customer data contain an element of judgment, hence, are not as accurate as information readily available from financial statements. The results, however, represent a combination of information from company records and information based on judgment of those most familiar with the subject.

Limitations to gallon sales data, Tables 7G and 7H.—Some bulk stations and terminals were unable to supply all of the information called for in Item 13 of the report form (See Appendix E) hence, measures of coverage are provided in tables 7G and 7H. The number of establishments and sales for "all establishments" are shown first, followed by separate data for those reporting the analysis as provided for in the tables. The "sales coverage" ratio is a comparison of dollar sales for establishments reporting information with dollar sales for all establishments, and should be taken into consideration in using the analyses provided in the tables.

Explanation of Table 7G.—Table 7G presents an analysis of sales, in gallons, by product. The analysis is in two general parts: "Total sales, all customers" and "Sales to retailers, users, and consumers." Data in the last five columns are also included in their respective columns under the heading "Total sales, all customers." Differences between the two sets of columns represent duplication; that is, sales from terminals and bulk stations to jobbers and distributors who in turn operate bulk stations or terminals.

KIND-OF-BUSINESS CLASSIFICATIONS

Wholesale Trade

Wholesale trade, as defined in major group 50 of the 1957 edition of the SIC Manual, and as covered in the 1958 Census, includes establishments primarily engaged in selling merchandise to retailers; to institutional, industrial, commercial and professional users; or to other wholesalers; or in negotiating as agents in buying merchandise for or selling merchandise to such persons or companies. Importers selling merchandise at wholesale in the United States market and exporters are included in wholesale trade.

Establishments covered by the census were assigned a kind-of-business classification in accordance with the provisions of the 1957 edition of the SIC Manual. However, because in some instances a more detailed classification is required for Census purposes than is available in the SIC Manual, additional kinds of business have been identified within the SIC categories.

It should be noted that kind-of-business classifications are not interchangeable with commodity classifications. Most businesses sell a number of kinds of commodities. The kind-of-business code assigned generally reflects either the individual commodity or commodity group which is the primary source of the establishment's receipts or some mixture of different commodities which characterizes the establishment's business. Thus, the classification of establishments by kind of business generally does not make it possible to determine either the number of establishments handling a particular commodity or the sales of that commodity. For example, the "groceries and related products" classification excludes establishments selling some food if the sale of food is not the primary source of receipts; moreover, even though establishments are classified as "groceries and related products" some of their receipts may be derived from the sale of non-food products.

Census classification of wholesale establishments was based upon information reported on Census forms. Questionnaires provided for respondents designating their kind of business on a checklist, and also for reporting their sales by commodity line. The establishment was assigned the classification consistent with the commodity-line data reported.

PROCEDURES AND DEFINITIONS-Continued

For example, an establishment self-designated "confectionery wholesaler" reporting confectionery as its principal line was so classified. However, an establishment self-designated as "confectionery" but primarily engaged in selling tobacco was classified as "tobacco wholesaler."

Establishments were classified in accordance with provisions of the 1957 edition of the SIC Manual, with the Census providing more detail. The SIC system provides for grouping all wholesale establishments into 40 classifications; whereas the Census, while observing the SIC classifications, identifies an additional 22 major kinds of business. These 62 classifications are further subdivided in some tabulations to show information for a total of 169 individual kinds of business as indicated below. Classifications which are subdivisions of SIC industries are separately listed but are described only when clarification is required.

Motor Vehicles, Automotive Equipment
(SIC 501)

Establishments primarily engaged in the wholesale distribution of new and used passenger automobiles and other vehicles, automotive parts and accessories, equipment for filling stations and garages, and rubber tires and tubes for passenger and commercial vehicles.

Automobiles, other motor vehicles (SIC 5012).—Establishments primarily engaged in the wholesale distribution of new and used passenger automobiles and other motor vehicles. Dealers primarily engaged in selling road-type commercial trucks, truck-tractors, truck-trailers, buses, semitrailers, and related vehicles are included. Automotive establishments primarily engaged in selling at retail to individual consumers for personal use, and also selling a limited amount of new and used passenger automobiles and trucks at wholesale are classified in retail trade.

New and used automobiles (SIC 5012 part).

Trucks, tractors; road type (SIC 5012 part).

Automotive equipment (SIC 5013).—Establishments primarily engaged in the wholesale distribution of new and used automotive parts and accessories, and filling station and garage service equipment. Establishments primarily engaged in the wholesale sale of tires and tubes are classified separately as outlined below.

Automotive glass (SIC 5013 part).

New automotive parts, accessories (SIC 5013 part).

Used automotive parts, accessories (SIC 5013 part).

Garage equipment, tools (SIC 5013 part).

Tires and tubes (SIC 5014).—Establishments primarily engaged in the wholesale distribution of rubber tires and tubes for passenger and commercial vehicles.

Drugs, Chemicals, Allied Products
(SIC 502)

Establishments primarily engaged in the wholesale distribution of drugs, drug proprietaries, druggists' sundries, and toiletries; paints and varnishes in paste or powder form or ready for use; and chemicals and allied products, not elsewhere classified, such as acids, ammonia, industrial and heavy chemicals, dyestuffs, industrial salts, insecticides, naval stores, plastic materials, rosin, and turpentine. Establishments primarily engaged in distributing ammunition and fireworks at wholesale are classified in SIC 5099.

Drugs, drug proprietaries, druggists' sundries (SIC 5022).—Establishments primarily engaged in the wholesale distribution of drugs, drug proprietaries, druggists' sundries, and toiletries. For surgical, medical, and hospital supply houses, see SIC Code 5086 below.

General-line drug wholesalers (SIC 5022 part).—These are distinguished from specialty-line drug and toiletries wholesalers on the basis of their commodity-line mix. Drug wholesalers were classified as general line if they reported 35 percent or more of their sales on each of the lines "Pharmaceuticals, antibiotics, druggists' chemicals, biologicals" and "Proprietary products, toiletries, druggists' sundries;" and their reported annual sales volume was \$1,000,000 or more. Other drug and related products distributors were classified as specialty-line drug and toiletry wholesalers (SIC 5022 part).

Paints, varnishes (SIC 5028).—Establishments primarily engaged in the wholesale distribution of paints and varnishes in paste or powder form or ready for use. Glass and wallpaper are frequently handled as important secondary lines.

Other chemicals, allied products (SIC 5029).—Establishments primarily engaged in the wholesale distribution of industrial chemicals such as acids, ammonia, industrial and heavy chemicals, dyestuffs, industrial salts, insecticides, naval stores, plastic materials, rosin, turpentine, and related products.

Dry Goods, Apparel
(SIC 503)

Establishments primarily engaged in the wholesale distribution of dry goods, piece goods, and notions as well as establishments primarily engaged in selling at wholesale apparel and accessories, hosiery, lingerie, and footwear.

TYPE-OF-OPERATION CLASSIFICATIONS

Wholesale Trade

In addition to kind of business, each wholesale establishment was classified by type of operation according to the ownership of the business, ownership of the goods sold, or character of principal transactions. Establishments in wholesale trade are grouped into five major type-of-operation groups and further classified as outlined below.

Merchant wholesalers.—This type group consists of wholesale establishments primarily engaged in buying and selling merchandise on their own account, including farm products merchants who do not buy primarily from farmers. Included in this group are the following types of operation:

Wholesale merchants, distributors.—Establishments primarily engaged in buying and selling merchandise in the domestic market and performing the principal wholesale functions—buying, stocking, selling, etc.

Importers.—Establishments buying and selling goods at wholesale on own account, whose principal source of purchases was foreign.

Exporters.—Establishments primarily engaged in purchasing goods in the United States and selling to foreign customers.

Rack merchandisers.—Establishments primarily engaged in placing their goods on display racks or shelves in retail stores for sale.

Terminal grain elevators.—Establishments with sizable storage space buying and selling grain received primarily by rail or barge rather than direct from farmers via truck or wagon.

Cash-carry wholesalers.—Establishments primarily engaged in selling on a cash-carry basis.

Wagon, truck distributors.—Establishments primarily engaged in selling their merchandise from trucks or other vehicles, combining the functions of salesmen with those of deliverymen, and carrying a limited assortment of well-known fast-moving items.

Other limited-function wholesalers.—Included here are other types of wholesale establishments buying and selling, at wholesale, merchandise on their own account and performing limited services—includes establishments known as drop shippers, desk jobbers, retailer cooperatives, consumer cooperative wholesalers, etc.

Manufacturers' sales branches, sales offices.—These establishments differ from merchant wholesalers in that they are owned by manufacturers or mining companies and maintained apart from producing plants primarily for selling or marketing their products at wholesale. Branch stores selling to household consumers and individual users are classified in retail trade. Sales branches or sales offices located at plants or administrative offices are included where separate records were available and could be reported separately. In some tables data are shown separately for manufacturers' sales branches and for sales offices. They differ in that sales offices normally do not carry stocks of merchandise for delivery to consumers.

Sales as recorded for sales branches include direct deliveries from plants on orders from the branches as well as deliveries from branch stocks. Sales as shown for sales offices generally represent the value of orders written or booked by employees at the offices including salesmen working out of the offices.

Petroleum bulk plants, terminals, LP gas facilities.—This group of establishments is distinguished by their facilities for receiving, storing, and marketing gasoline, kerosene, distillate and residual fuel oils, liquefied petroleum gases, and other bulk petroleum products at wholesale. Facilities are divided into two general groups: Bulk plants and terminals primarily engaged in marketing petroleum products other than liquefied petroleum (LP) gas, and wholesale LP gas facilities.

Merchandise agents, brokers.—This group includes establishments whose operators are in business for themselves and are primarily engaged in selling—or buying—goods for others. "Sales" as shown in Census publications for agents and brokers represent the sales, or purchase, value of the goods in the transactions negotiated. They include some approximation as many agents and brokers do not maintain accurate records of dollar sales.

In lieu of operating expenses, merchandise agents and brokers were requested to report the amount of brokerage or commissions received during 1958 on purchases or sales of goods for the account of others. Summaries of the amounts so reported are included under the heading "operating expenses."

Auction companies.—Wholesale establishments primarily engaged in selling merchandise on an agency basis by the auction method.

Merchandise brokers.—Wholesale establishments primarily engaged in buying or selling merchandise in

PROCEDURES AND DEFINITIONS—Continued

the domestic market on a brokerage basis, but not receiving the goods on consignment.

Commission merchants.—Wholesale establishments operating in the domestic market receiving goods for sale on consignment.

Import agents.—Merchandise agents and brokers in the domestic market buying merchandise from or selling merchandise for foreign firms.

Export agents.—Merchandise agents and brokers in the domestic market selling to or buying for foreign customers.

Manufacturers' agents.—Wholesale establishments in the domestic market selling for a limited number of manufacturers on a continuing agency basis.

Selling agents.—Wholesale establishments primarily engaged in selling, on an agency basis in the domestic market, all or the major portion of the output of clients.

Purchasing agents, resident buyers.—Wholesale establishments primarily engaged in buying merchandise on an agency basis, in the domestic market, for a limited number of customers on a continuing basis.

Assemblers of farm products.—This group consists of establishments primarily engaged in purchasing from farmers and assembling farm products in local producing markets and in cities of producing regions.

Country grain elevators.—Grain elevators, cooperative or other, buying and receiving grain direct from farmers by truck or wagon and selling at wholesale.

Commission buyers of farm products.—Wholesale establishments primarily engaged in buying farm products from farmers on a commission basis for others.

Fresh fruit, vegetable packinghouses.—Wholesale establishments, cooperative or other, primarily engaged in packing and marketing fresh fruits and vegetables received direct from farmers.

Livestock concentration yards.—Establishments primarily engaged in receiving, assembling, short-period feeding when necessary, and marketing livestock.

Other assemblers of farm products.—Establishments, such as cream stations, produce stations, leaf tobacco dealers, etc., buying farm products primarily from farmers and marketing at wholesale.

KIND-OF-BUSINESS CLASSIFICATIONS

Public Warehousing

Household Goods Warehousing and Storage
(SIC 4214 and 4224)

Establishments engaged in the public storage of household goods, including warehouses of firms also engaged in trucking. These warehouses are devoted primarily to public storage of household goods, usually for the home owner or user of the goods. Many establishments in this classification also conduct some general merchandise warehousing business.

General Warehousing and Storage
(SIC 4225)

Establishments primarily engaged in the warehousing and storage of a general line of goods. General warehousing and storage establishments frequently also do some household goods warehousing.

Refrigerated Warehousing, Except Food Lockers
(SIC 4222)

Establishments (except food lockers) primarily engaged in the public storage of perishable goods at artificially low temperatures. Refrigerated warehouses operated for private use are not included. Likewise, ice plants, poultry dressing plants, and other similar facilities whose principal receipts are from processing goods, but which provide some public refrigerated space, are not covered in this report.

Food Lockers, With or Without Food Preparation Facilities
(SIC 4223)

Establishments primarily engaged in renting locker space, the storage of foods for individual households, including establishments which provide services for processing, preparing, or packaging such foods for storage.

In accordance with the standard system of classifying establishments on the basis of their primary activity, this category includes only those warehouses whose primary activity is the rental of food lockers. It does not include any data for food locker rental by ice plants, refrigerated warehouses, dairies, etc. For those interested in data on food lockers in total, the U.S. Department of Agriculture, Farmer Cooperative Service, occasionally publishes data on food lockers regardless of the primary activity of the establishment which operates them.

Farm Products Warehousing and Storage
(SIC 4221)

Establishments primarily engaged in the public storage of farm products, such as grain, cotton, tobacco, and other nonmanufactured farm products not requiring artificially low temperatures.

Other Special Warehousing and Storage
(SIC 4226)

Establishments primarily engaged in the public storage of special products, not elsewhere classified, such as automobiles (dead storage only), textile, whiskey, goods in bond, and goods at foreign trade zones.

ITEM 11.—TYPE OF OPERATION

Enter a check mark in the box before the type of operation most suited to your business—the basis on which the major portion of your operations was conducted in 1958. Check one box only.

Converter (piece goods).—Check this box if you are primarily engaged in buying piece goods in the grey and having them finished for you on commission by plants affiliated with your company or by independent finishers.

Importer.—Check this box if your source of purchase is primarily foreign.

Exporter.—Check this box if you are primarily engaged in purchasing goods in the United States and selling to foreign customers (see Item 7c (5)).

Rack merchandiser.—Check this box if you are primarily engaged in placing your goods on display racks or shelves in retail stores for sale.

Cash-carry wholesalers.—Check this box if the majority of sales, Item 7a, were on a cash-carry basis, and if the business is not operated by a cooperative group. If it is operated by a cooperative, check either consumer-cooperative wholesaler or retailer-owned wholesaler according to type of operation.

Drop or direct-mill shipper.—Check this box if this establishment carries little or no stock but purchases merchandise for sale and has it shipped from supplier to customer.

Consumer-cooperative wholesaler.—Check this box if this establishment is owned by cooperatives whose members are consumers.

Retailer-owned wholesaler.—Check this box if this establishment is owned by a cooperative whose members are retailers.

Wholesaler, wholesale merchant, jobber.—Check this box if none of the other types is primary to your operation and if you are primarily engaged in buying and selling merchandise in the domestic market and performing the principal wholesale functions—buying, stocking, selling, etc.

Other type (Specify).—If none of the other types of operations applies, check this box and describe briefly your method of operation; for example, manufacturers' agent, manufacturers' sales branch, manufacturer, etc.

ITEM 12.—KIND OF BUSINESS

CHECK the ONE box that best describes the business of this establishment in 1958. If none applies, check the last box and enter the description by which your business is known to the trade or public. CHECK ONE BOX ONLY.

ITEM 11.—TYPE OF OPERATION

Section a.—Enter a check mark in the box before the type of operation most suited to your business—the basis on which the major portion of your operations was conducted in 1958. Check one box only.

Rack Merchandiser.—Check this box if you are primarily engaged in placing your goods on display racks or shelves in retail stores for sale.

Wholesaler—Exporter—Importer.—Check this box if you are primarily engaged in purchasing goods in the United States and selling to foreign customers (see Item 7c (5)).

Importer.—Check this box if your source of purchase is primarily foreign.

Cash-carry wholesaler.—Check this box if the majority of sales, Item 7a, were on a cash-carry basis, and if the business is not operated by a cooperative group. If it is operated by a cooperative, check either consumer-cooperative wholesaler or retailer-owned wholesaler according to type of operation.

Wagon or truck distributor.—Check here if you customarily sell from a truck or other vehicle, combining the function of salesman with that of deliveryman; and carry a limited assortment of well-known fast-moving items.

Consumer-cooperative wholesaler.—Check this box if this establishment is owned by cooperatives whose members are consumers.

Retailer-owned wholesaler.—Check this box if this establishment is owned by a cooperative whose members are retailers.

Wholesaler, wholesale merchant, jobber.—Check this box if none of the other types is primary to your operation and if you are primarily engaged in buying and selling merchandise in the domestic market and performing the principal wholesale functions—buying, stocking, selling, etc. If you operate primarily as a rack merchandiser, cash-carry wholesaler, wagon distributor or any other of the types listed, check the appropriate box, not this one.

Farm Product Assembler (Buying from farmers)

Packing house—fresh fruits, vegetables.—Check this box if the establishment, cooperative or other, is primarily engaged in packing and marketing fresh fruits and vegetables received directly from farmers.

Commission buyer of farm products.—Check this box if the establishment is primarily engaged in buying farm products on a commission basis for others.

Cooperative sales agency.—Check this box if the establishment is owned by a cooperative association and is primarily engaged in selling merchandise on an agency basis.

Other type (Specify).—If none of the other types of operation applies, check this box and describe briefly your method of operation; for example manufacturers' agent, food broker, manufacturers' sales branch, manufacturer, etc.

Section b.—Check "yes" if the establishment covered by this report sponsors or is affiliated with a group of independent retailers engaged in joint advertising or other sales promotion under a group name or identification; or if the establishment is owned and operated cooperatively by a group of independent retailers buying collectively.

ITEM 12.—KIND OF BUSINESS Check the one box that best describes the business of this establishment in 1958. If none applies, check the last box and enter the description by which your business is known to the trade or public. CHECK ONE BOX ONLY.

GENERAL INSTRUCTIONS																																	
Please complete and return this form in the return envelope to the Bureau of the Census, Jeffersonville, Indiana, not later than 30 days after you receive it. A separate report is required on this form for each sales branch and sales office operated during 1958. Sales offices without stock should be reported separately as well as sales branches carrying stocks of merchandise from which deliveries are made to customers. Sales branches and sales offices located at plants or administrative offices should be reported on this form where separate records are available, or if substantially accurate reports can be prepared. Employment, payroll, inventories, and operating expenses reported here should not be included in manufacturer's plant reports (MC series). Sales, however, will to some extent duplicate shipments on your plant reports.																																	
Only sales branches and sales offices as described above should be reported on this form, as separate reports are required for other establishments (plants, retail stores, or other places of business) of this organization. Please read all instructions and fill in all items, entering "None," when applicable. You may report fiscal-year figures. If book figures are not available, enter your best estimate and write "Estimate" after such entries.

ITEM 10

WAREHOUSE AND STORAGE SPACE, DEC. 31, 1958

Section a.—Warehouse floor space

Line (1).—Report total occupiable (occupied plus unoccupied) public floor space. Report inside measurements, but do not include interior walls, permanent aisles, elevator shafts, staircases, offices, receiving and shipping platforms or other areas in which goods are not usually piled. For multiple story buildings, report space on all floors. Do not report here refrigerated storage space, frozen food locker space, bulk liquid storage space and bin storage space.

Line (2).—Report here total occupiable space reserved for own use or leased to tenants regardless of who employs personnel handling stored material. Include any space leased to the military.

Section b.—Refrigerated net piling space

Net piling space is space for storing commodities—inside space measured from wall to wall and from floor to ceiling, less space for ventilation (outside the piling), coils, aisles, posts, sprinklers, etc. Do not report frozen food locker space here.

Line (1).—Report here the refrigerated (net piling) space, 50° Fahrenheit or below.

Line (2).—Report here the refrigerated (net piling) space reserved for own use or leased to tenants regardless of who employs personnel handling stored material. Include any space leased to the military.

Section c.—Frozen food locker space, Dec. 31, 1958

Include data on number of lockers installed and freezer space available for bulk storage at food locker plants.

Line (1).—Report number of individual lockers having storage space of less than 25 cubic feet each, that were installed as of Dec. 31, 1958.

Line (2).—Report in cubic feet the available freezer space in food locker plants not being utilized for individual lockers, and available (whether or not occupied) for bulk storage. Do not report here freezer space in facilities other than food locker plants. Do not report here freezer storage warehouse space or cooler space.

Section d.—Report bulk liquid storage (shell or water) capacity in gallons, not barrels.

Section e.—Report bin space (rated capacity) in bushels.
